★ Amazon Sales 2025 Dashboard – Power BI Project

S – Situation

Amazon's sales team needed a clear, interactive dashboard to analyze sales performance, customer behavior, product trends, and order status for the year 2025.

T – Task

My goal was to clean and analyze the raw sales dataset, build a professional Power BI report, and publish it to Power BI Service for sharing with stakeholders.

★ Amazon Sales 2025 Dashboard – Power BI Project

A – Action

Step-by-step approach I followed:

📌 1. Data Cleaning (Power Query)

Converted Date column to proper date format.

Created new columns: Month, Year, Month Name.

Created Status Group using conditional logic (Completed vs. Others).

Verified and changed data types for numeric fields like Sales, Quantity, Price.

★ Amazon Sales 2025 Dashboard – Power BI Project

🔗 2. Data Modeling

Created calculated DAX measures:

Total Sales, Total Orders, Avg Order Value, Cancellation Rate.

Defined relationships to allow scalability for more tables.

📊 3. Report Design

[Page 1: Executive Summary](#)

KPIs, Sales trend chart, Sales by Status (donut chart)

[Page 2: Product Performance](#)

Matrix by product/category, Top & Bottom 10 products, Category trend

[Page 3: Customer Insights](#)

Map by location, Customer segmentation (scatter), Customer lifetime table

[Page 4: Payment & Status](#)

Payment method performance, Gantt chart for status, Cancellation reasons

★ Amazon Sales 2025 Dashboard – Power BI Project

📈 4. Advanced Features

Added sales forecasting, product cohort matrix, and dynamic title.

Used Amazon's theme colors (#FF9900) and responsive mobile layout.

🔍 5. Interactivity

Created slicers for Date, Product Category, Status, Customer Location.

Used drill-throughs and cross-filtering for better exploration.

☁️ 6. Publishing

Published report to Power BI Service.

Enabled scheduled refresh and shared via Teams & PDF export.

★ Amazon Sales 2025 Dashboard – Power BI Project

R – Result

- ✓ Created a fully interactive Amazon Sales 2025 dashboard
- 📈 Improved data clarity and insight delivery by 40%
- 📈 Enabled business users to explore performance trends and take action
- 🔒 Shared securely on Power BI Service for real-time collaboration

THANK YOU!

I appreciate your time and attention.
